Enterprise Risk Management (ERM) doesn’t need to be daunting.

What’s most important is to keep your ERM program moving forward, whether you’re just getting started or have already taken steps to implement a program on your campus.

The onsite consulting from Canopy Programs by United Educators (UE) leverages UE’s extensive claims data and education expertise to help schools:

- Take a proactive approach to identifying and managing risks
- Align stakeholders and overcome the challenges of ERM adoption on campus
- Establish a foundation to achieve long-term risk management goals
I highly recommend this program for anyone who is sure that they need to establish a risk management process, but don’t have the staff, training, or experience to know where to begin.

– Chief Information Officer, ERM workshop participant

Take the next step toward advancing ERM at your K-12 or higher ed institution today.
